

# Share eBooks & audiobooks across districts and schools

## Expand access to digital resources

### What is a shared collection?

A shared collection enables two or more schools or districts to access digital content via a joint platform. Purchased titles are available to all participating schools or districts through this central access point.

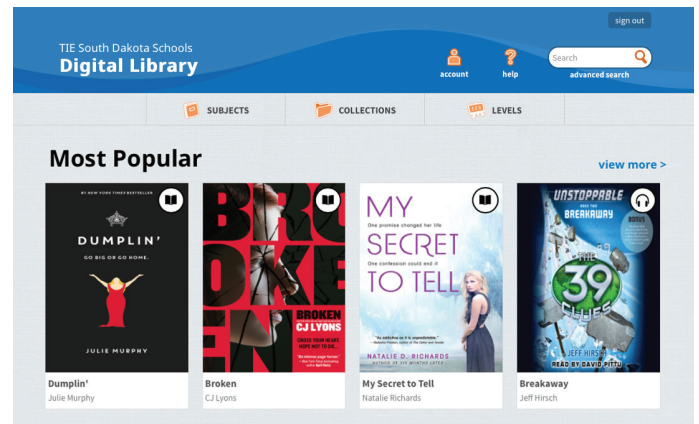

### Why join?

If School A were to initiate a digital collection of their own, they may only be able to afford 50 titles. However, by joining a collection shared by 20 schools or districts, School A would have access to 1,000 titles. This shared collection grows year after year and as more schools or districts join.

### How do I get started?

- Partner with neighboring schools or districts to start a shared collection or join an existing one in your region
- OverDrive builds your shared collection's easy-to-use digital lending platform or seamlessly integrates you into an existing one, and works with you to choose the right titles for maximum engagement
- All purchased titles are available to all members of the shared collection via the OverDrive app or directly in the user's browser, and this selection grows as more schools or districts join

Technology & Innovation in Education South Dakota Schools

### Additional benefits include:

- An unbeatable cost of \$1 or less per student
- The ability to add titles specifically for your school or district (separate from the shared collection)
- Titles filtered by grade level to ensure the right titles are reaching the right students
- Content specialists to help select the best titles based on group, school or district needs
